October 06, 2021

As a result of 2020 development and market progress GeaCom is experiencing an increased demand for its products in 2021 and 2022. The Company has, in partnership with Arrow Electronics, been meticulously and continuously adding to its component inventory to be prepared production runs. GeaCom has been also working with Keytronic, an Oakdale Minnesota contract manufacturer for refinement and assembly of its highly sophisticated medical technology.

Customers in the K-12 space in Minnesota, Wisconsin and Iowa are a significant source of demand. The enterprise health market is also increasing demand. The Althing Clinic services are in need of more product and there are expansions with current customers. Finally export demand is anticipated to increase in 2022. The overall production needs for 2022 exceed 10,000 units.

About GeaCom

GeaCom is a leading global healthcare engagement solutions provider, with its patented systems deployed in hospitals, community clinics, and educational environments. Its systems are developed in the US, and compliant with healthcare regulatory approval and data privacy standards in the countries deployed. The Company's service teams and its partners provide equitable and effective health engagements across all demographics, resulting in improved patient experiences and positive outcomes and productivity improvements for healthcare providers. To date, GeaCom's solutions have provided over 40,000,000 engagements in hundreds of languages, across 5 continents, as we lead the relentless pursuit of equitable excellence in vital services.
